

TEST PLAN

<<Rozetka>>

Abstract

This document provides an overview of the project and the product test strategy, a list of testing deliverables and plan for development

INTRODUCTION

The Test Plan is designed to prescribe the scope, approach, resources, and schedule of all testing activities of the project Rozetka (rozetka.com.ua) .

The plan identify the items to be tested, the features to be tested, the types of testing to be performed, the personnel responsible for testing, the resources and schedule required to complete testing, and the risks associated with the plan.

1 TEST STRATEGY

1.1 Scope of Testing

1.1.1 Feature to be tested

All the feature of Rozetka (rozetka.com.ua) which were defined in software requirement specs

Module Name	Applicable Roles	Description
Online Shopping	Manager Customer	Customer: A customer can do online shopping via catalogue and search bar. He can form, place and edit his orders. Manager: A manager can view and edit orders of all the customers
Payments	Manager Customer	Customer: A customer can make online payments by a registered bank card or by cash. Manager: A manager can view the funds online, enroll cash funds to the customer account
Return of Goods	Manager Customer	Goods can be return within 14-day period Customer: A customer can complete an online application form in his personal account Manager: A manager can see and process the application form
Order Picking-up	Manager Customer	Online navigation for onsite pick-up points Customer: A customer can search for the pick-up point located within 500 meters of his location Manager: A manager can see the search results and the selected pick-up point
Change Password	Manager Customer	Customer: A customer can change password of only his account. Manager: A manager can change password of only his account. He cannot change passwords of his customers
New Customer	Manager	Manager: A manager can add a new customer.
	Manager	Manager: A manager can edit details like address, email, telephone of a customer.
Bonus Account	Manager	Currently system provides 2 types of options <ul style="list-style-type: none"> • Available • Awaits activation A customer have a bonus account by default. He can refuse from the bonus account and annrl his bonuses

		Manager: A manager can add see all bonus accounts
Edit Profile	Customer	Customer: A customer edit his profile (personal information, contacts, delivery address, contacts)
Delete Customer	Manager	Manager: A manager can delete a customer.

1.1.2 Feature not to be tested

These feature are not be tested because they are not included in the software requirement specs

- User Interfaces
- Hardware Interfaces
- Software Interfaces
- Database logical
- Communications Interfaces
- Website Security and Performance

1.2 Test Type

In the project Rozetka (rozetka.com.ua) , there're 3 types of testing should be conducted.

- **Integration** Testing (Individual software modules are combined and tested as a group)
- **System** Testing: Conducted on a **complete, integrated** system to evaluate the system's compliance with its specified requirements
- **API testing:** Test all the APIs create for the software under tested

1.3 Risk and Issues

Risk	Mitigation
Team member lack the required skills for website testing.	Plan training course to skill up your members
The project schedule is too tight; it's hard to complete this project on time	Set Test Priority for each of the test activity.
Test Manager has poor management skill	Plan leadership training for manager

A lack of cooperation negatively affects your employees' productivity	Encourage each team member in his task, and inspire them to greater efforts.
Wrong budget estimate and cost overruns	Establish the scope before beginning work, pay a lot of attention to project planning and constantly track and measure the progress

1.4 Test Logistics

1.4.1 Who will test?

The project should use **outsource** members as the tester to save the project cost

1.4.2 When will test occur?

The tester will start the test execution when all the following inputs are ready

- Software is available for testing
- Test Specification is created
- Test Environment is built
- Enough human resource for testing

2 TEST OBJECTIVE

The test objectives are to **verify** the Functionality of Rozetka (rozetka.com.ua), the project should focus on testing the **purchase operation** such as Orders formation, Orders placement, on the payment operation, and on the Goods return operation ...etc. to **guarantee** all these operation can work **normally** in real business environment.

3 TEST CRITERIA

3.1 Suspension Criteria

If the team members report that there are **40%** of test cases **failed**, suspend testing until the development team fixes all the failed cases.

3.2 Exit Criteria

Specifies the criteria that denote a **successful** completion of a test phase

- **Run** rate is mandatory to be **100%** unless a clear reason is given.
- **Pass** rate is **80%**, achieving the pass rate is **mandatory**.

4 RESOURCE PLANNING

4.1 System Resource

No.	Resources	Descriptions
1.	Server	Need a Database server which install MySQL server Web server which install Apache Server

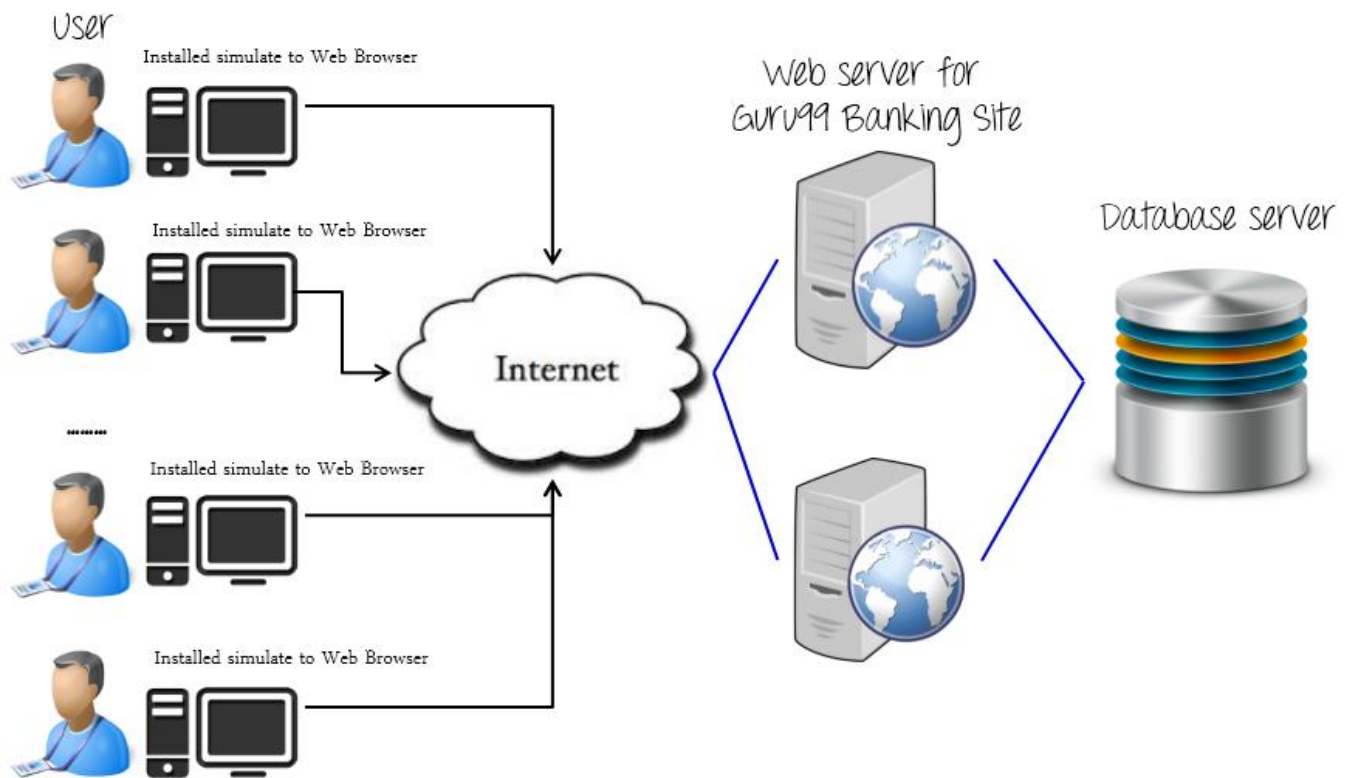

2.	Test tool	Develop a Test tool which can auto generate the test result to the pre-defined form and automated test execution
3.	Network	Setup a LAN Gigabit and 1 internet line with the speed at least 5 Mb/s
4.	Computer	At least 4 computer run Windows 7, Ram 2GB, CPU 3.4GHZ

4.2 Human Resource

No.	Member	Tasks
1.	Test Manager	Manage the whole project Define project directions Acquire appropriate resources
2.	Test	Identifying and describing appropriate test techniques/tools/automation architecture Verify and assess the Test Approach Execute the tests, Log results, Report the defects. Outsourced members
3.	Developer in Test	Implement the test cases, test program, test suite etc.
4.	Test Administrator	Builds up and ensures test environment and assets are managed and maintained Support Tester to use the test environment for test execution
5.	SQA members	Take in charge of quality assurance Check to confirm whether the testing process is meeting specified requirements

5 TEST ENVIRONMENT

The Test Environment should be setup as figure below

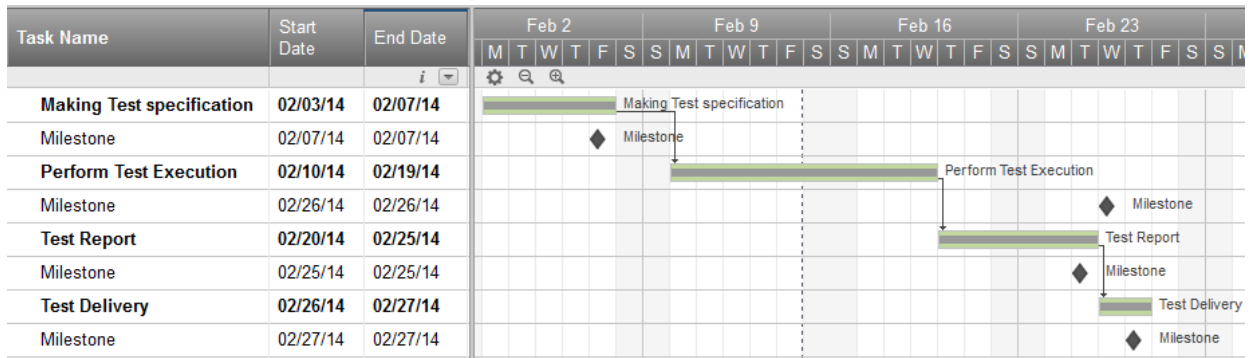

6 SCHEDULE & ESTIMATION

6.1 All project task and estimation

Task	Members	Estimate effort
Create the test specification	Test Designer	140 man-hour
Perform Test Execution	Tester, Test Administrator	160 man-hour
Test Report	Tester	20 man-hour
Test Delivery		40 man-hour
Total		560 man-hour

6.2 Schedule to complete these tasks

7 TEST DELIVERABLES

Test deliverables are provided as below

7.1 Before testing phase

- Test plans document.
- Test cases documents
- Test Design specifications.

7.2 During the testing

- Test Tool
- Simulators.
- Test Data
- Test Trace-ability Matrix
- Error logs and execution logs.

7.3 After the testing cycles is over

- **Test Results/reports**
- Defect Report
- Installation/ Test procedures guidelines
- **Release notes**
